INFORMATION SECURITY & CYBER SECURITY CONSULTING

COMPANY PROFILE

We secure your organisation against cyber threats in a measurable way

ISO 27001, ISO 22301 and ISO 14298 consulting, penetration testing, SOC/SIEM implementation, secure software development and more under one roof, backed by public- and private-sector experience.

2016
Year founded

20+ years
Founding team's experience in IT

Public & private
Project experience across sectors

// FRAMEWORKS WE WORK WITH

ISO 27001 · ISO 22301 · ISO 14298 · KVKK / GDPR · OWASP · MITRE ATT&CK · NIST CSF

// WHO WE ARE

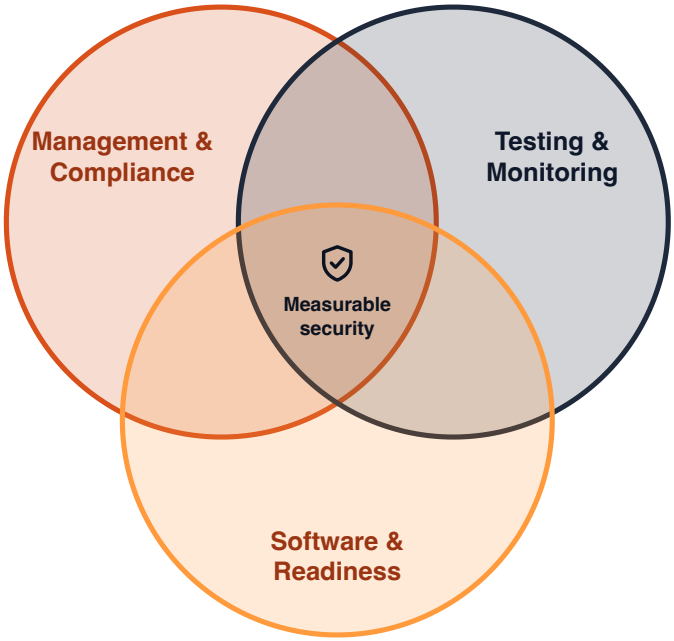
Over 20 years in IT, a focused approach to information security

Troy Bilgi Teknolojileri was founded in 2016. Our founders have worked in the IT sector for more than 20 years across various companies. We use this experience to deliver the fastest and most effective solution for our clients' needs. We share what we have learned from public- and private-sector projects in information and cyber security.

From analysis to delivery, we are with you at every stage.

// OUR APPROACH

Three areas, one goal: measurable security



Management & Compliance
ISO 27001 / 22301 / 14298 · KVKK · Cyber security consulting

Testing & Monitoring
Penetration testing · Vulnerability management · SOC/SIEM, Endpoint, DDoS

Software & Readiness
Secure software development · Awareness · Incident response readiness

Security becomes measurable when governance, technical validation and secure development complement each other.

Every organisation's security needs are different. We shape the solution to fit.

// OUR PRINCIPLES

Our principles

Customer focus
Under our unconditional customer satisfaction policy, your requests come first.

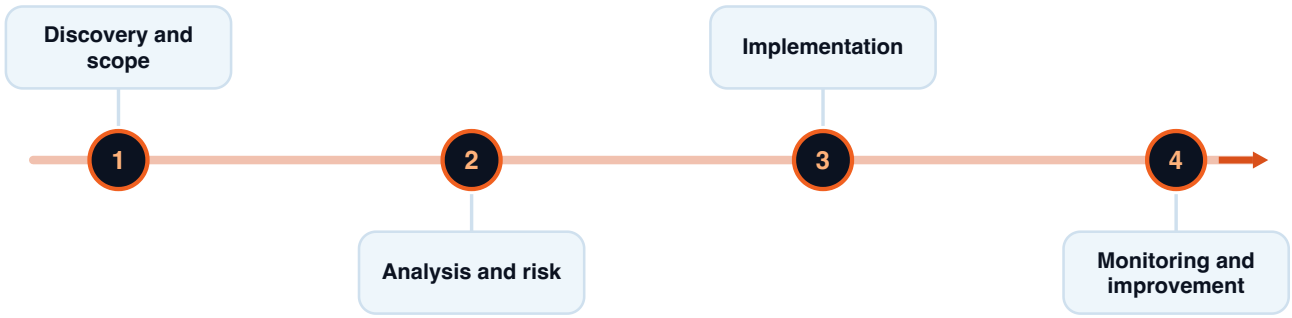
Security first
We always put security first and test our solutions against the IT industry's security standards.

Current technology
We follow technological developments continuously and bring innovations into our work.

Effective communication
We stay in touch with you at every stage, from analysis to delivery.

// METHOD

How we work



1 — Discovery and scope
We clarify your business goals, assets and expectations together.

2 — Analysis and risk
We assess and prioritise the current state and risks against standards.

3 — Implementation
We put controls, technical solutions and documentation into practice with your team.

4 — Monitoring and improvement
We measure results and set up a continuous improvement cycle.

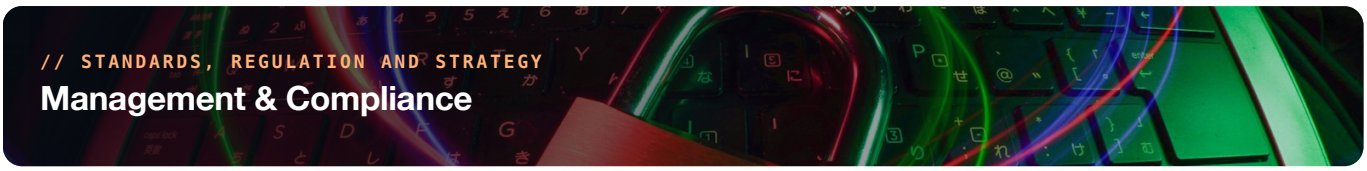
// SERVICE CATALOGUE

Our services



// STANDARDS, REGULATION AND STRATEGY
Management & Compliance

ISO 27001 Consulting
Setting up, maturing and preparing for audit of your Information Security Management System.

ISO 22301 Consulting
A business continuity management system that makes your critical processes resilient to disruption.

ISO 14298 Consulting
Security management system set-up for secure printing (banknotes, ID documents, valuable documents).

ISO 9001 Consulting
Building a quality management system, clarifying processes and preparing for the certification audit.

KVKK Compliance Consulting
Technical and administrative support for compliance with the Turkish Personal Data Protection Law (KVKK).

Cyber Security Consulting
Independent view on your security strategy, architecture and maturity.

Risk Management Consulting
Identifying, rating and treating information and cyber security risks.

// TECHNICAL VALIDATION AND CONTINUOUS MONITORING
Testing & Monitoring

Penetration Testing
We test your systems from an attacker's perspective and reveal weaknesses in a controlled way.

Regular Vulnerability Scanning and Management
Sustainable vulnerability management through regular scanning, prioritisation and remediation tracking.

DoS, DDoS Testing and Protection
We test your services' resilience to heavy-traffic attacks and build protection architecture.

SOC / SIEM Implementation
A monitoring infrastructure that collects, correlates and alerts on events centrally.

Endpoint Security Monitoring
We monitor your endpoints with advanced security solutions and detect threats early.

// SECURE DEVELOPMENT, AWARENESS AND INCIDENT READINESS
Software & Readiness

Secure Software Development
We integrate security into every stage of the software lifecycle.

Information Security Awareness Program
A year-round, measurable awareness programme that becomes part of your culture.

Incident Response Readiness
Plan in advance what to do during a security incident and minimise its impact.

// WHY TROY?

Why Troy?

Risk-driven
We identify your critical assets and threats and direct resources to the highest-impact controls.

Governance + technical
We technically validate policies and processes through testing, monitoring and measurement.

Actionable outputs
Prioritised findings, an executive summary and steps your team can apply right away.

Vendor-neutral
We recommend only the solution that best fits your needs.
