// WHO WE ARE

Over 20 years in IT, a focused approach to information security

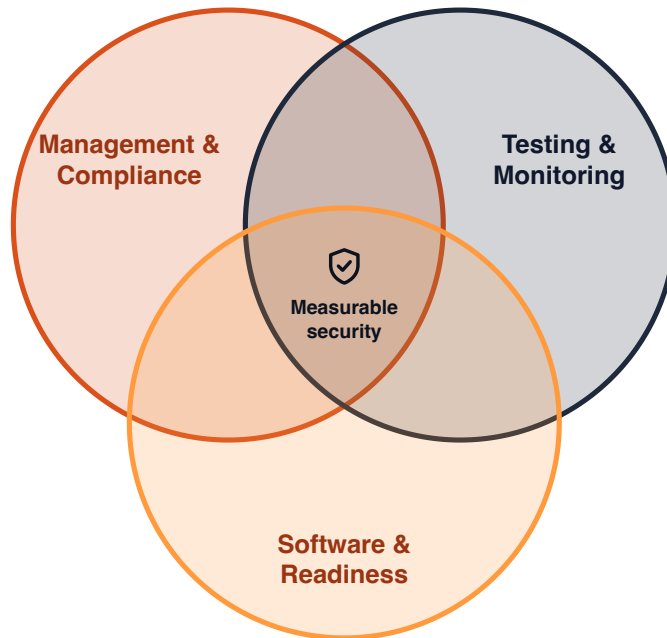

Troy Bilgi Teknolojileri was founded in 2016. Our founders have worked in the IT sector for more than 20 years across various companies. We use this experience to deliver the fastest and most effective solution for our clients' needs. We share what we have learned from public- and private-sector projects in information and cyber security.

From analysis to delivery,
we are with you at every stage.

// OUR APPROACH

Three areas, one goal: measurable security

**Management & Compliance**

ISO 27001 / 22301 / 14298 · KVKK ·
Cyber security consulting

Testing & Monitoring

Penetration testing · Vulnerability
management · SOC/SIEM, Endpoint,
DDoS

Software & Readiness

Secure software development ·
Awareness · Incident response
readiness

Security becomes measurable when governance, technical validation and secure development complement each other.

**Every organisation's security needs are different.
We shape the solution to fit.**

// OUR PRINCIPLES

Our principles

**Customer focus**

Under our unconditional customer satisfaction
policy, your requests come first.

**Security first**

We always put security first and test our
solutions against the IT industry's security
standards.

**Current technology**

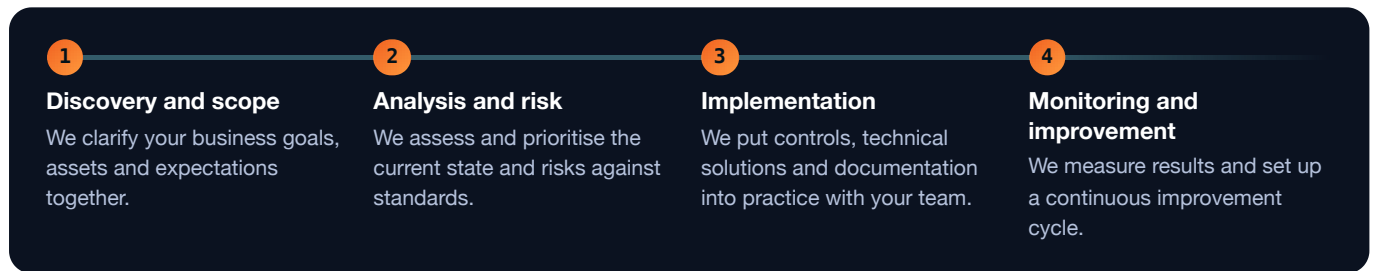

We follow technological developments
continuously and bring innovations into our
work.

**Effective communication**

We stay in touch with you at every stage, from
analysis to delivery.

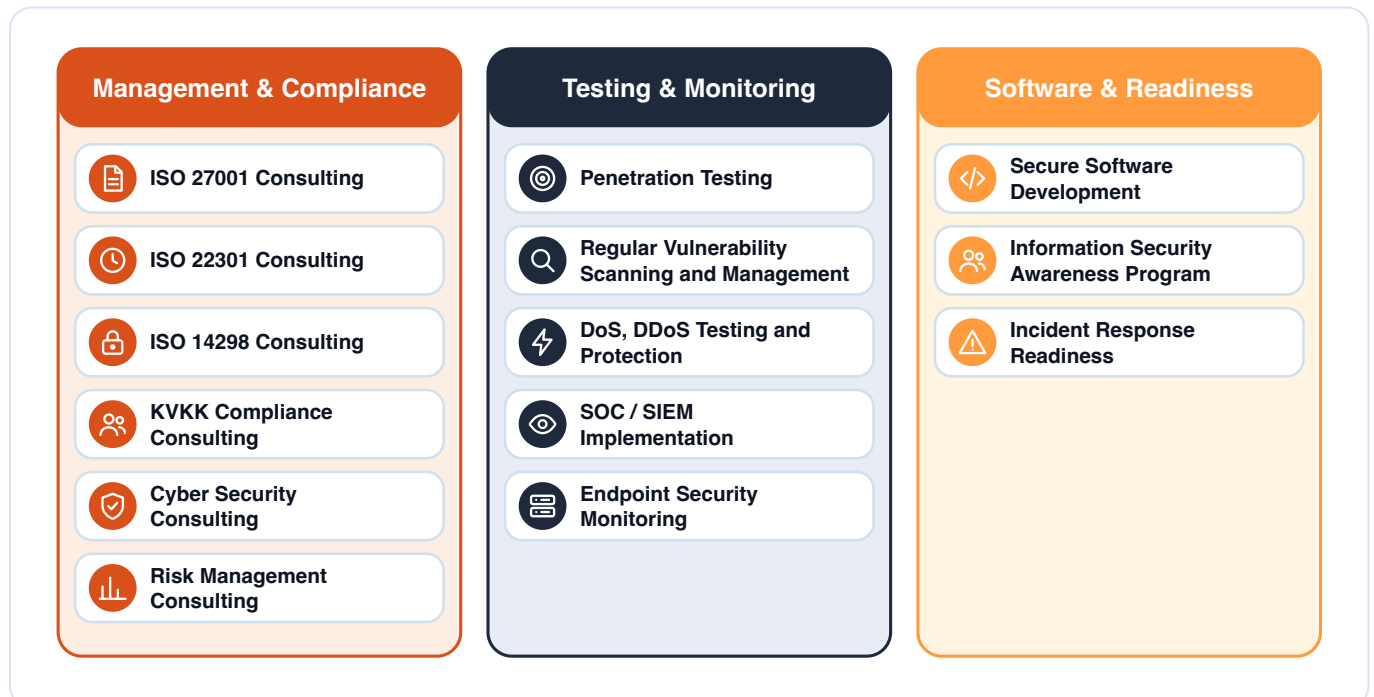

// METHOD

How we work

// SERVICE MAP

14 services under one roof

Detailed brochures and information forms for each service are available on our website.

Our services

// STANDARDS, REGULATION AND STRATEGY

Management & Compliance

**ISO 27001 Consulting**

Setting up, maturing and preparing for audit of your Information Security Management System.

**ISO 22301 Consulting**

A business continuity management system that makes your critical processes resilient to disruption.

**ISO 14298 Consulting**

Security management system set-up for secure printing (banknotes, ID documents, valuable documents).

**KVKK Compliance Consulting**

Technical and administrative support for compliance with the Turkish Personal Data Protection Law (KVKK).

**Cyber Security Consulting**

Independent view on your security strategy, architecture and maturity.

**Risk Management Consulting**

Identifying, rating and treating information and cyber security risks.

// TECHNICAL VALIDATION AND CONTINUOUS MONITORING

Testing & Monitoring

**Penetration Testing**

We test your systems from an attacker's perspective and reveal weaknesses in a controlled way.

**Regular Vulnerability Scanning and Management**

Sustainable vulnerability management through regular scanning, prioritisation and remediation tracking.

**DoS, DDoS Testing and Protection**

We test your services' resilience to heavy-traffic attacks and build protection architecture.

**SOC / SIEM Implementation**

A monitoring infrastructure that collects, correlates and alerts on events centrally.

**Endpoint Security Monitoring**

We monitor your endpoints with advanced security solutions and detect threats early.

// SECURE DEVELOPMENT, AWARENESS AND INCIDENT READINESS

Software & Readiness

**Secure Software Development**

We integrate security into every stage of the software lifecycle.

**Information Security Awareness Program**

A year-round, measurable awareness programme that becomes part of your culture.

**Incident Response Readiness**

Plan in advance what to do during a security incident and minimise its impact.

CONTACT

Let's make your security measurable together

Detailed brochures and information forms for each service are on our website. Contact us for a tailored first meeting.

// WHY TROY?

Why Troy?

Risk-driven

We identify your critical assets and threats and direct resources to the highest-impact controls.

Governance + technical

We technically validate policies and processes through testing, monitoring and measurement.

Actionable outputs

Prioritised findings, an executive summary and steps your team can apply right away.

Vendor-neutral

We recommend only the solution that best fits your needs.
