

MANAGEMENT & COMPLIANCE

KVKK Compliance Consulting

We provide technical and administrative support in identifying your obligations under Turkish Law No. 6698 on the Protection of Personal Data (KVKK), organising your processes accordingly and keeping compliance sustainable.

// WHY IT MATTERS

Why it matters

KVKK compliance is not just writing a few documents; it requires knowing where, why and how personal data is processed and taking technical and administrative measures. Handling this together with your information security processes makes the work easier and makes the measures concrete.

Our service is technical and administrative compliance support and does not constitute legal advice. For legal assessments we work together with your legal counsel.

// WHO IS IT FOR?

Who is this service for?

Any organisation that processes customer or employee data

Companies collecting data through websites, forms and apps

Those processing other organisations' data as service providers

Those who want to align with ISO 27001 work

// SCOPE

What does it cover?

**Data inventory**

We map the processes, data categories and data flows that involve personal data.

**Notices and consent processes**

We support the preparation of privacy notices and consent management processes.

**VERBİS assessment**

We support assessing and completing your data controllers registry (VERBİS) obligation.

**Technical and administrative measures**

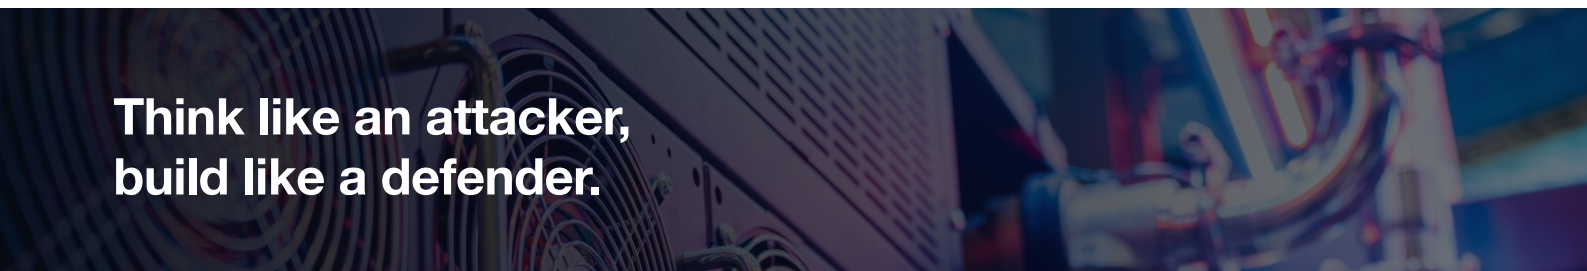

We review measures against the Board guidelines and identify gaps.

**Retention and destruction policy**

We define retention periods and destruction processes.

**Data breach procedure**

We design breach detection, assessment and notification in advance.

Think like an attacker, build like a defender.

// METHOD

How we work

1

Current-state assessment

We review your data processing activities and existing documents.

2

Data inventory and risk analysis

We build the personal data inventory and assess risks.

3

Closing the gaps

We complete policies, notices and technical measures.

4

Training and awareness

We explain the compliance processes to relevant staff.

5

Sustaining

We monitor changes and keep compliance alive through regular reviews.

// DELIVERABLES

What do we deliver?

Personal data inventory

Policy and procedure set

Data breach response procedure

Data flow map

Retention and destruction policy

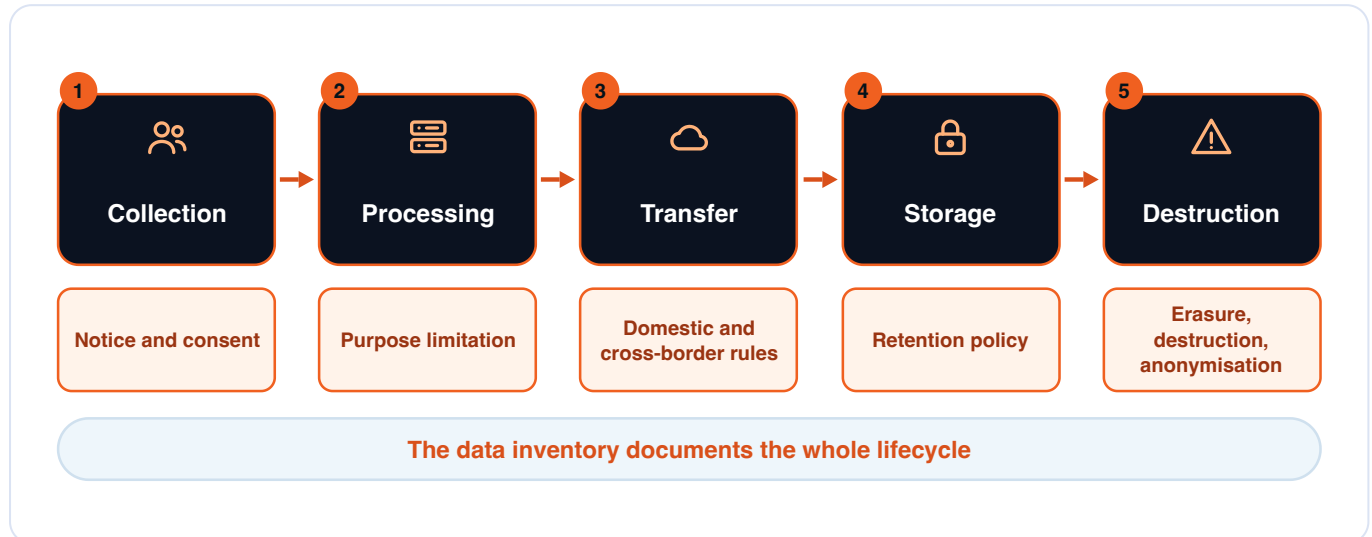

Technical and administrative measures assessment

// VISUAL GUIDE

Service-specific visuals

The personal data lifecycle

Data protection duties apply at every stage from collection to destruction; the data inventory maps this path.

**Duties at every stage**

Notice at collection, purpose limits in processing, retention periods in storage, methods in destruction.

Inventory is the base

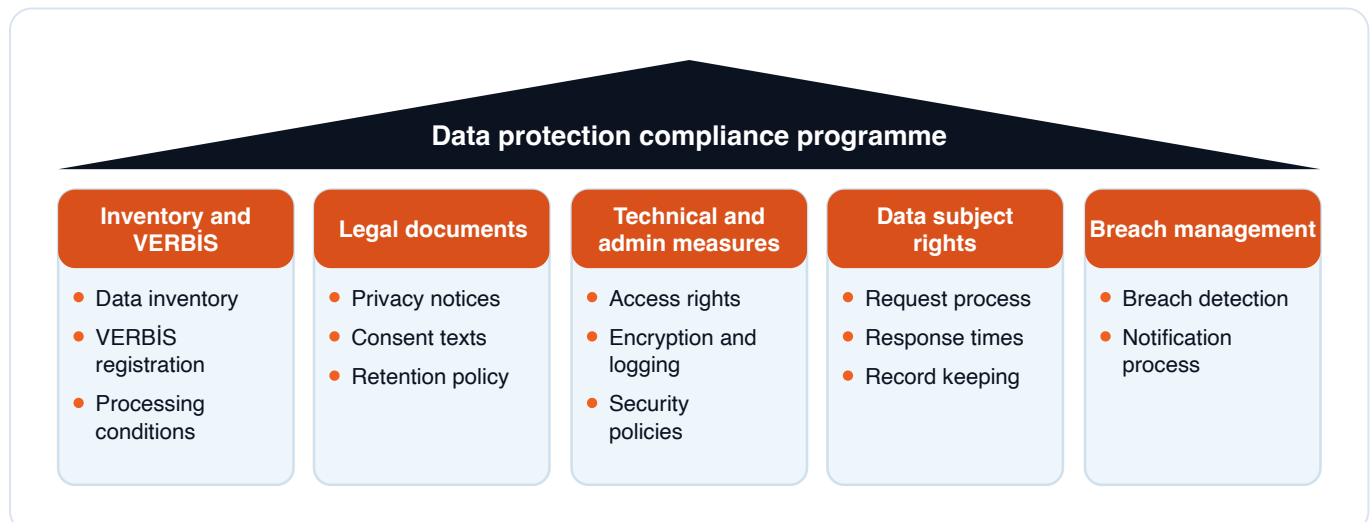

Compliance is impossible without knowing what data is held, where, why and for how long.

Transfer is its own risk

Cross-border and third-party transfers are assessed separately.

Components of a data protection compliance framework

Legal, technical and administrative measures run together.

**Legal and technical**

Documents alone are not enough; technical and administrative measures are evidenced too.

Rights are managed

Data subject requests are answered through a defined process and on time.

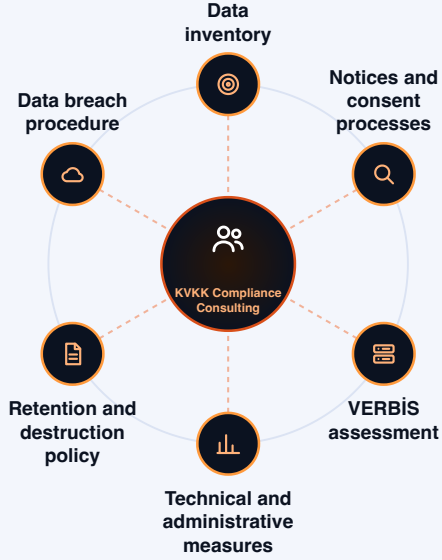

Breach readiness

Who is notified, how and when is planned before a breach happens.
